Mr. Mike Radlovic
Applied Process Technology
1325 Solera Lane
Diamond Bar, CA 91765

Dear Mr. Radlovic:

As we discussed by telephone some time ago and this morning, the BPOU Steering Committee is interested in the possible applications of your treatment process to perchlorate ion removal. We understand that you are developing data from your work at the Lante Well which indicate perchlorate removal during the oxidation as well as the adsorption process. Representatives of the Steering Committee would like to meet with you as soon as those data are available to discuss the possible further use of your technology.

Please call me at (916) 355-4282 to discuss the availability of data and possibilities for meeting dates.

Very truly yours,

A handwritten signature in black ink that reads "Donald E. Vanderkar". The signature is fluid and cursive, with a large initial "D".

Donald E. Vanderkar, Co-Chair
BPOU Steering Committee
